ENCOMPASS
MINING SOLUTIONS

UNLOCK THE **POTENTIAL** OF YOUR RESOURCE

Capability Statement

WHO WE ARE

Encompass Mining can help you unlock the potential of your resource by providing solutions to mine smarter. Founded in 2010 in Brisbane, Australia, Encompass Mining is a consulting firm that specialises in delivering mine exploration, design, planning, operation, & financial solutions to resource companies across Australia & the world.

Our dedicated and experienced team are skilled in the fields of Geology, Geotechnical Engineering, Mining Engineering and Business Consulting and our diverse range of services are centred on the technical aspect of the mine development cycle with the following three core requirements at the heart of everything we do: create, evaluate and support.

HOW CAN WE HELP **ELEVATE** YOUR PROJECT?

- **GEOLOGY**
- **GEOTECHNICAL ENGINEERING**
- **MINING ENGINEERING**
- **CORPORATE ADVISORY**

CREATE

We believe that creating value from a resource deposit starts with the baseline data. Employing the latest in geological and geotechnical modelling techniques we unlock the potential of a resource to create the most efficient and optimised mine design.

EVALUATE

Whether we are working with you on an existing operation or a greenfield site, we combine our extensive exploration and mining experience with our diligent approach to technical evaluation to provide an intelligent solution that works for you.

SUPPORT

Having the right people in the right roles is important to a successful outcome. Encompass Mining Solutions employ and train competent geologists and engineers to provide the right type, and level of support you need, when you need it.

SMART SOLUTIONS FOR SUSTAINABLE RESOURCE MANAGEMENT

GEOLOGY SERVICES

Our team of seasoned geologists brings unparalleled expertise and a deep understanding of what it takes to deliver robust and consistent geological models and resource estimates. With a wealth of experience working with major mining companies, our geologists know exactly what is required to exceed expectations and deliver exceptional results within your timeline. Whether it's a geological model, resource estimate, or due diligence review, we work closely with you to ensure the best outcomes.

GEOTECHNICAL ENGINEERING

Encompass Mining has experienced geotechnical engineers who have worked across a variety of commodities in both underground and open cut mining environments. Our engineers work closely with you to deliver a smarter, tailor-made geotechnical solution, whether it be a design conformance check, remedial design or a Life of Asset assessment.

MINING ENGINEERING

Our team of experienced mining engineers have worked across a large range of resources in all corners of the globe. Our principal engineers work closely with our engineers and senior engineers to ensure that no matter what level of work needs to be performed, from short-term dig designs to high level financial modelling, you will be leveraging the expertise of a team of recognised industry leaders.

CORPORATE ADVISORY

Encompass Mining has experts in the fields of resource geology, geotechnical engineering and mine engineering that along with industry partners provide expert advice including project evaluations, due diligence and investment advice for the mining sectors.
